Conference code: ECIO14

Meeting

website: www.ecio.org/?pid=84&lang=1

Exhibition address:

Estrel Convention Centre
Sonnenallee 225
12057 Berlin
Germany

Exhibition overview

Interventional Oncology offers effective treatment of many malignant tumours with minimally invasive techniques. In numerous cases, Interventional Oncology achieves the destruction of tumours with fewer complications and more rapid recovery than traditional surgical methods. It also greatly contributes to the palliation of cancers, making it the fourth pillar of modern cancer care alongside radiation oncology, surgical oncology and medical oncology.

The programme of ECIO will include both clinical and technical focus sessions, in which leading experts from all around the world will present state-of-the-art techniques, as well as developments and innovations that are currently undergoing clinical investigation. Hands-on workshops and interactive sessions on the management of complications will be further expanded. In addition, to accommodate the multi-faceted nature of oncological care and to help support the clinical aspects of Interventional Oncology, multidisciplinary tumour boards, including the discussion of clinical cases will aim to develop clinical practice guidelines and treatment recommendations.
