Exhibition overview

The scientific programme of the 31st IEC promises to be innovative and engaging with a wide range of main and parallel sessions, as well as teaching and video sessions.

The congress will discuss the latest developments and directions in translational epilepsy research. Congress delegates will hear a summary of how the newest experimental findings, discussed at WONOE, will change the way we diagnose and treat epilepsy in the clinic. For those delegates with a special interest in translational research, there will be a dedicated translational programme every day. The Neurobiology Symposium will be dedicated to 'Optogenetics to cure epilepsy: Facts and feasibility'
