

8th European Multidisciplinary Colorectal Cancer Congress

11 - 13 December 2016, Amsterdam, NETHERLANDS

Anticipated attendance: 800 delegates

Delegate profile: Oncologists and other medical professionals specialised in cancer treatment.

Conference code: MCCC16

Meeting website: <http://www.emccc2016.org/>

Exhibition address:

RAI Convention Centre Europaplein 1078 GZ,
Amsterdam The Netherlands

Exhibition overview

Colorectal cancer is one of the most common types of malignancies and much progress has been made in recent years in understanding the biology and treatment of this disease. These developments encompass almost the full research area including genetics, biology, pathology/prognostic markers, surgery, screening, systemic treatment, radiotherapy, and imaging. This implies that both pre-clinical and clinical research is becoming much more multidisciplinary oriented.

The conference will have separate workshops on surgery, medical oncology, radiotherapy, pathology, imaging, gastroenterology, and genetics, but all other sessions are plenary in order to have optimal interaction between all disciplines.

The format of the conference consists of workshops, keynote lecture, controversy sessions, satellite symposia, and oral and poster presentations on prevention and screening, diagnosis and follow-up, translational research, multidisciplinary management, genetics, evaluation of treatment, and updates on randomized CRC trials.
