Madrid

Spain

Exhibition overview

The European League Against Rheumatism (EULAR) is the organisation which represents the patient, health professional and scientific societies of rheumatology of all the European nations. EULAR endeavours to stimulate, promote, and support the research, prevention, treatment and rehabilitation of rheumatic diseases. In line with UEMS, EULAR defines rheumatology as including rheumatic diseases of the connective tissue, locomotor and musculoskeletal systems.

The annual EULAR congresses which began in 2000 are today a major event in the calendar of world rheumatology. The Congress will facilitate interaction between patients, medical doctors, scientists, health professionals and professionals representing the pharmaceutical industry both from Europe and from around the world.
