Exhibition overview

The Symposium's theme 'Moving Boundaries' has been selected to reflect upon the daily challenges that physicians are confronted with in their endeavour to expand the specialty towards new and fascinating territories, and in keeping up with the ever-changing world of skin diseases.

Focusing in all areas of dermatology and venereology, the scientific program promises to include the best of new and innovative treatment modalities, developed in accordance with the vastly growing medical technologies. These will be presented through the eyes and expertise of distinguished speakers who will share their knowledge and experience, leaving all participants with just that extra bit of know-how at the end.
