

## 6th European Congress of Pharmacology

17 - 20 July 2012, Granada, SPAIN

**Anticipated attendance:** 1500 delegates

**Delegate profile:** Basic and Clinical  
Pharmacologists as well as related Bioscientists.

**Conference code:** EPHA12

**Meeting**

**website:** <http://www.ephar2012.org/information.html>

**Exhibition address:**

Granada Congress and Exhibition Centre  
Paseo del Violon s/n  
18006

### Exhibition overview

The scientific objectives of this event are to: - Gain insight on the mechanism of action of new/old drugs - Understand the pharmacological properties, pharmacodynamic and pharmacokinetic, of old/new drugs - Evaluate the clinical efficacy and safety of drugs - Identify unmet needs for the development of new drugs - Bring together basic and clinical pharmacology - Promote the cooperation between National/regional Pharmacological Societies in Europe

### Exhibition details

Topics will include:

Neuropsychopharmacology -

- The Pharmacological Modulation of Adult Neural Stem/Progenitor Cells
- Phytocannabinoid Based Medicines: Promising Perspectives for Brain Disorders
- New Perspectives in the Treatment of Sleep Disorders
- Present and Future Immunoglobins in the Management of Neurological Diseases
- Second Generation Antipsychotics and Serotonin 5HT<sub>2A</sub> Receptors

Receptors -

- Latest Developments in Cys-Loop Receptor Structure and Function
- Biological and Therapeutic Roles of Glycine Receptors
- Rho/Rho-Kinase Signalling in Health and Diseases
- Novel Targeting of the 5-HT<sub>3</sub> for Potential Therapeutic Benefit
- Molecular Pharmacology: Towards the Understanding of Biased Agonism

- TRP Channels

Cardiovascular Pharmacology -

- The Carotid Body: Target for New Drugs and Advanced Therapies
- Organic Nitrates from Molecular Mechanisms to Clinical Implications
- Pharmacology of Vascular Calcium Signalling
- Novel Targets for the Treatment of Hypertension
- Novel Targets in Chronic Stable Angina

Endocrinology and Metabolism -

- New Pharmacological Approaches to Complex Diseases: Obesity, Metabolic Syndrome and T2DM
- Antidiabetic Treatments and the Brain

Pharmacology of Pain and Inflammation -

- Botulinum Toxin Type-A and Pain
- Novel Targets for the Treatment of Inflammatory Diseases
- Sigma-1 Receptors: A New Target for Pain Treatment
- Symptomatic Slow Acting Drugs for Osteoarthritis
- Novel Mechanisms and Molecules for the Treatment of Inflammation

Respiratory and Gastrointestinal Pharmacology -

- New Perspectives in the Role of Bronchodilators for the Treatment of Airway Diseases
- New Therapies for Pulmonary Hypertension
- Respiratory Pharmacology and Pulmonary Surfactant
- Interfering with the Crosstalk Between Immune Cells in Gastrointestinal Disorders

Pharmacogenomics -

- From Drug Development to Clinical Practice
- Personalised Medicine: From Concept to Reality

Teaching -

- Teaching Pharmacology to Medical Students
- Standards for PhD Education in Biomedicine

## Deadline details

- Entry into Wisepress Congress Price List: **June 19, 2012**
- Receipt of display material: **June 19, 2012**

### Exhibition shipping address for late entries

Publishers who miss the display materials deadline date need to send their material directly to the exhibition:

Please [contact Wisepress](mailto:marketing@wisepress.com) (marketing@wisepress.com) for full shipping details.
