

30th International Congress of Clinical Neurophysiology

19 - 23 March 2014, Berlin, GERMANY

Anticipated attendance: 2000 delegates

Delegate profile: Clinical Neurophysiologists

Conference code: ICCN14

Meeting website: www.iccn2014.de

Exhibition address:

Estrel Hotel & Convention Center Berlin
Sonnenallee 225
12057 Berlin (DE)

Exhibition overview

The 30th International Congress of Clinical Neurophysiology (ICCN) of the International Federation of Clinical Neurophysiology (IFCN). The ICCN2014 will take place in Berlin from March 20–23, 2014 and will be organized in conjunction with the Annual Meeting of the German Society for Clinical Neurophysiology and Functional Imaging (DGKN) scheduled from March 19–22, 2014.

In recent years, clinical neurophysiology and functional brain imaging have evolved as hot spots of scientific research on the function of the nervous system. We have gathered together leading scientists contributing to the congress on topics such as consciousness, sleep, cognition, epilepsy, aging plasticity, deep brain stimulation, non-invasive brain stimulation, pain as well as many other topics. Recent advances in measurement and imaging systems have opened up new possibilities for the investigation of fundamental functions of the human brain and peripheral nervous system.

The highly competitive teaching program gives the opportunity to learn from world-leading experts in their field. The teaching courses comprehensively cover topics dealing with different techniques such as ultrasound, especially high resolution ultrasound and MRI of muscle, nerve and brain. ICCN2014 shall also show how these methods are embedded in the clinical context, studying neuromuscular disorders, epilepsy, sleep, pain, cognitive and central movement disorders, brain plasticity in stroke, neurodegeneration and neuroinflammation and others.
