North Wall Quay
Dublin 1
Ireland

Exhibition overview

Founded in 1962, the European Society for Paediatric Endocrinology (ESPE) is an international organisation aiming to promote the highest levels of knowledge, research, education and clinical practice in paediatric endocrinology and metabolism throughout the world.

Paediatric endocrinology is a specialty of children's medicine (paediatrics) caring for babies, children and adolescents with growth, puberty, sexual development problems and other disorders of the hormone producing glands of the body. These include diabetes, thyroid and adrenal gland problems, early and late puberty, and growth hormone deficiency.

The ESPE annual scientific meeting, which is held in different European cities and countries, is recognised worldwide as a meeting of high scientific and educational quality. In 2014, the meeting will take place in Dublin, Ireland. The theme is "Prevention and therapeutic innovations in paediatric endocrinology."
