Greece

Exhibition overview

12th World Congress of Biological Psychiatry; the World Federation of Societies of Biological Psychiatry (WFSBP) is unique in bringing together basic neuroscientists and clinical psychiatrists from various cultural and geographical backgrounds, and is an important forum for the future of psychiatry. It is the ideal setting to discuss the current progress in molecular biology, the development of novel drugs based upon new concepts, and the advances in modern neuroscience that will change approaches to psychiatric disorders and attitudes towards mental health care.
